ALEX RIVERA

Aspiring AI Engineer

Visakhapatnam, Andhra Pradesh | +91 98765 43210 | alex.rivera@example.com
github.com/alexrivera-demo | linkedin.com/in/alexrivera-demo

PROFILE

Computer Science student focused on Artificial Intelligence, Machine Learning and Data Science. Experienced with Python-based applications, basic ML workflows, REST APIs and databases. Currently strengthening Deep Learning, NLP, RAG and production AI engineering skills through hands-on projects.

EDUCATION

B.Tech - Computer Science & Engineering, ABC Institute of Technology 2024 - 2028

Relevant Coursework: Data Structures, DBMS, Artificial Intelligence, Machine Learning, Probability & Statistics, Operating Systems

TECHNICAL SKILLS

Programming: Python, Java, C, JavaScript
AI / ML: Machine Learning, Scikit-learn, Pandas, NumPy, Basic TensorFlow, NLP
Web / APIs: React, TypeScript, HTML, CSS, FastAPI, REST APIs
Databases: MongoDB, MySQL, SQL
Tools: Git, GitHub, VS Code, Jupyter Notebook
Current Learning: Deep Learning, RAG, Docker, Cloud Computing

PROJECTS

AI Career Intelligence Platform | *React, TypeScript, FastAPI, MongoDB, Python, OpenRouter, RAG*

- Developed a personalized career-intelligence platform with competency and skill-gap analysis.
- Implemented adaptive learning roadmaps, evidence-based skill verification and an AI mentor.
- Designed RAG-based grounded guidance and project/assessment workflows.

Banking Fraud Detection System | *Python, Scikit-learn, FastAPI, Pandas*

- Built an ML-based fraud classification workflow with preprocessing and model evaluation.
- Exposed predictions through FastAPI and created a dashboard for inference results.

Student Performance Prediction | *Python, Pandas, Scikit-learn*

- Trained and compared classification models on student-performance data.
- Visualized important factors and evaluated model accuracy across algorithms.

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- Python Programming - Online Course
- Introduction to Machine Learning - Online Course
- SQL Fundamentals - Online Course

Achievements

- Participated in college-level hackathons
- Built multiple academic AI/ML projects
- Maintains personal GitHub project repositories

CAREER OBJECTIVE & SELF-REPORTED SKILLS

Objective: Become an AI Engineer building reliable intelligent systems with ML, Deep Learning, NLP and modern AI technologies.

Self-reported proficiency: Python - Advanced; Machine Learning - Intermediate; SQL - Intermediate; React - Intermediate; MongoDB - Intermediate; Deep Learning - Beginner; NLP - Beginner; RAG - Beginner; Docker - Beginner; Cloud - Beginner.

Demo resume created for testing skill extraction, evidence verification, gap analysis and career-readiness workflows.
